INVITATION

# SKills for long term unemploYed - SKY

Final seminar - Brussels

The SKY project is financed by the Erasmus+ programme of the European Union and proposes to experiment with the implementation of micro-training courses enabling LTU's to get out of the blocked situation in which they find themselves in order to acquire professional skills that meet the needs of the companies in a given territory.

- The objectives of the project are :
- 1.To enable LTUs to acquire valuable skills by setting up short training courses in order to reintegrate them socially and professionally and to give them the desire to learn to learn.
  - 2.To offer a complementary tool (micro-training and micro-certification partnerships) to the organisations in charge of training and supporting LTUs.
